

Pipeline ROI

To give you control over your domain, you just need to register with them (it's free) and make sure to fill out your user profile (a credit card is NOT required). Then, tell us your ENOM username, so we can "push" the domain over to your ENOM account.

1. If you don't already have an ENOM account, navigate to <http://www.ENOM.com>.
2. To sign up with ENOM, click **My Account** in the upper right, click **Sign Up**, and follow the steps to create your account. *Be sure to log into your account after creating it and update ALL of your contact information, otherwise the domain will fail to transfer.*
3. Fill out the form below with information for the Pipeline ROI account holder, then print the page and sign it.
4. Now, scan the completed form and a photo ID (or the account holder's professional license) back to your computer.
5. Once they're saved on your PC, send an e-mail to domains@pipelineroi.com with both documents attached.

Within two business days of receiving your information, we'll turn your domain over to your ENOM Username, putting you in full control of your domain name. If you want your domain to point away from your Pipeline ROI site, go into the administrative area of your ENOM account and enter information for your new web host.

Pipeline ROI customer number

Name of account holder

ENOM Login ID (username)

Domain(s) to transfer

Account holder's signature

Use the area below to attach your photo ID:

NOTE: The best form of photo ID is a government issued ID, such as your driver's license.
